CHANDLER ARIZONAN

Pave with Asphaltic Concrete for true economy

The type of pavement to be laid in Maricopa County's new highways directly affects the pocketbook of every taxpayer in the county.

The successful cost of building Asphaltic Concrete pavement combined with its great durability, resulting in negligible maintenance costs, means economy and saves the taxpayer money.

Asphaltic Concrete can be placed in the winter months and is not subject to the same deterioration caused by long use of hot asphalt.

Asphaltic Concrete has already been demonstrated as an economical and durable material for the paving of highways and other public roads.

It is proved in fact by the many of the highest successful service under conditions of traffic and other conditions in America.

This is a feature of Maricopa County, which has now approved such a plan. It will be accomplished by the construction of Asphaltic Concrete highways.

State of Special Election

D. W. Hoard
